Grant Proposal

Mission

Our mission is to provide awareness for the arts, which have decreased in last few years. In Allegany County there are a handful of high schools where the arts have been put on the side because of budget cuts. The percentage of elementary schools with a visual arts class declined from 87 to 83 percent. Without art students cannot be informed of the arts and cannot have an outlet during school. The arts seemed to not be important because it is not measured by a state exam.

Main Objective

The Goal is promote art awareness throughout many different communities. It is important to promote the arts to children and the community to make sure it is still in the children's lives.

The main objectives include:

1. Providing awareness throughout the communities
2. Show how the arts can be used
3. Show that there are many entities that include the arts

Our Procedure

The project includes building a product similar to a "Jack in the box". However a projector would be added in which it would show a simple animation such as a walk cycle. As the crank rotates in a clockwise direction the projection flips through the numerous amount of images to create the walk cycle on a flat surface such as a wall. The time of day that is preferred is nighttime so that the animation could be shown clearly on the wall like surface.

Budget

The budget consists of funds needed for the parts to build the "Jack in the box." Material is also needed to create the animation frames.

| Supply | Need | Cost |
|---------|---|-------------------|
| Plywood | to build the shell of the jack in the box | 2 for \$47.94 |
| Nails | to hold the plywood together | 1 box for \$12.98 |

| Supply | Need | Cost |
|---------------------|---|-----------------|
| Led flashlight | to project the animation on the flat surface | 1 for \$49.95 |
| crank | to move the pictures to create the animation | 1 for \$32.95 |
| transparency sheets | to print the scenes on so you can project on the flat surface | 1 package 34.29 |

evaluation

The arts are slowly disappearing from our community. Small art projects can help prevent the loss of the knowledge. Kids need to be creative.
